

I Claim:

1. An overall improved cover for electronic devices such as cellular phones. The cover is comprised of a sheet of any material that is digitally or otherwise enhanced by a users choice and tastes.
 - (i) this sheet may be edited within an unobtrusive stencil.
 - (ii) this stencil may be perforated around its applicable areas for ease of removal from the main sheet.
 - (iii) the sheet may be textured selectively by films, doping processes, or any other method enhancing aesthetics, shock absorption, grip, or glare protection.
 - (iv) the sheet may be attached to the device by adhesives, or enclosed within a clear, tinted, or translucent case.
 - (v) a small perforation that allows for the integration of a clip or other method of attaching the device to other things.
